ABOUT LBI Ltd

LBI Ltd is an UK company, member of the London Chamber of Commerce and Industry (LCCI). LBI Ltd's purpose is to design, finance, build and operate integrated and tailor-made industrial zones with high added value in sub-saharan africa.

With a sound african background, LBI Ltd's team managers know how to identify industrial gaps in African countries that unlock value in order to create new industries. Its aim is to industrialize key sectors by creating local transformation, maximizing production, efficiency and cost, which in turn generates local value addition.

Our trusted partnerships with top level african governments and investors will enable LBI Ltd to execute large-scale projects that transform local value chains and industrialize countries in an environmentally sustainable way.

LBI Ltd will operate in sub-saharan africa, leveraging tailored special economic zones to drive exports, foster local processing of raw materials, and facilitate trade.

To do so, one of the main service provided by LBI Ltd will be to transform or improve local industries in smart Industries.

As a matter of fact, many african countries are willing to have smart industries but do not know how to make them happen, so LBI Ltd will assist and support them. *LBI Ltd is looking for an international company knowing how to develop smart industries (ports, mine, agriculture, transports...) so that a partnership will be setting up.* Therefore, LBI Ltd's concern is to organise this business between this international company, the african countries and LBI Ltd as a middle company.
